EDUCATION

University of Illinois Urbana-Champaign Expected 2030
B.S. in Mathematics (considering Computer Science + Mathematics)

St John's College, Johannesburg Graduated 2025
Cambridge A-Levels: A Mathematics, A* Further Mathematics, A Chinese, A Physics, B Chemistry*

EXPERIENCE

Founder & Developer — 店小力 Dianxiaoli, AI Digital Shop Assistant Apr 2026 – Present · Remote

- Designed and built, as a solo developer, an AI sales assistant that lives inside WeChat Customer Service and WhatsApp for wholesalers, factories and retailers: answers buyers 24/7 in Chinese and English, quotes from the merchant's own catalogue (FOB tiers, MOQ, lead times), confirms orders and escalates edge cases to the owner.
- Live with 3 paying clients across China and South Africa — an office-equipment distributor, a wholesale stall (~300 SKUs, ~300 buyers) and a fashion retailer with automated Instagram posting.
- Python / FastAPI backend on Railway; model routing across DeepSeek, Anthropic and OpenAI with rule-engine fallback; 355-check automated quality gate (scenario gates, vision and audit tests) plus Playwright end-to-end tests; Excel catalogue import, daily QA audit reports, merchant health-profile export API.
- Cut deployment time per merchant from 3 weeks (first client) to 2–3 days through an industry skill-pack framework and self-service onboarding.

External AI Product Collaboration — Licensed fintech company, China Sep 2026 – Present · Remote

- Selected through the company's talent programme to develop a standardised edition of Dianxiaoli for its small-business merchants under an external-collaboration arrangement, with a joint company planned once the product reaches scale.
- Lead product and engineering; designing the merchant-data interface and rollout plan with the partner's team.

Actuarial Job Shadows — Discovery; Argen Actuarial Solutions Apr – May 2024 · Johannesburg

- Observed risk assessment, pricing models, actuarial valuations and client advisory work at one of South Africa's largest financial services groups and at a specialist actuarial consultancy.

Mathematics Tutor (volunteer) 2022 – 2025

- 100+ hours tutoring high-school mathematics and maths olympiad preparation.

PROJECTS

- AI Study Tutor** — reads a student's handwritten past-paper answer, grades it by logic (accepting any valid method), explains mistakes step by step and generates fresh practice problems on the spot.
- harrisonhe.com** — personal site built from scratch in HTML/CSS/JavaScript, including 青, an AI chat assistant served through a serverless proxy with multi-provider LLM support.
- Cambridge Research Project** — cryptocurrency price behaviour and regression techniques.

ACHIEVEMENTS

- South African Mathematics Olympiad: 4th (2021), 7th (2022), Top 50 (2023), Top 20 (2024, 2025) nationally; South Africa IMO selection training camp, Stellenbosch University, 2021–2024.
- University of the Witwatersrand Mathematics Competition: Top 10, 2023–2025; South Africa Team Maths Competition: 2nd place 2021–2024, 4th 2025; Estonian Maths Open: Top 20–50 within South Africa.
- South African Informatics Olympiad: passed first round 2023, 2024; Estonian Informatics Open: Top 15 within South Africa.
- Qualified Professional Level 1 Go player (China); Black Belt, Taekwondo; Level 2 swimmer (South Africa).

SKILLS

- Programming:** Python (FastAPI), JavaScript / HTML / CSS, Java, Git, Playwright; deployment on Railway and Vercel.
- AI engineering:** LLM application design with DeepSeek, Anthropic and OpenAI APIs; prompt and agent design; automated evaluation gates; WeChat and WhatsApp platform integration.
- Languages:** Mandarin and English (both fluent).
